Chameleon Website: News Page, Use Case

UML:

Figure 1: Chameleon Website Use Case for the News Page.

Use Case Description:

1. **User:** At first the user opens the chameleon website through the web browser by logging in and gaining access to the website functionality.

2. **News Page:** After successfully logging into the chameleon website, the user can navigate to the news page to explore the latest articles and the updates about the projects and its details.

3. **News Articles:** The user can click on the particular news article and read the full content. There are 3 project icons on the news page and the user can check the news articles of all the 3 projects: i.e., Ev Adoption tools, City of Melbourne open data, chameleon website. The system will be able to display the full content of the selected news article.

4. **Like, share News:** The user will have the option to like or share the news to other people if he/she would like the information regarding the project and can do it as promoting engagement and interaction.
